DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 27-29, 31-32 & 42-46, drawn to a bootstrap routine, classified in class 713, subclass 2.
 - II. Claims 33-37, 38-41 & 47-52, drawn to program back-up routine, classified in class 707, subclass 104.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as for an initial bootstrap routine, which is utilized upon start-up of a computer system. For instance, Hoggarth, (U.S. Pat # 6,535,976) provides an example of a bootstrap routine. See MPEP § 806.05(d).
3. A telephone call was made to Andrew C. Sonu on 8/11/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2611

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
